	GRAMMATICAL RANGE & ACCURACY	7.0	PRONUNCIATION	6.5

YOUR PERFORMANCE AT A GLANCE

Your strongest areas were uses natural hesitation and uses natural collocations. To move closer to Band 7.5, focus first on short or underdeveloped answers and repeats basic vocabulary. The personalised actions on page 2 show how to practise these areas.

WHAT YOU'RE ALREADY DOING WELL

- Uses natural hesitation
- Uses natural collocations
- Produces frequent error-free sentences
- Uses meaningful intonation

WHAT IS HOLDING YOUR SCORE BACK

- Short or underdeveloped answers
- Repeats basic vocabulary
- Flat intonation

CONCISE CRITERION COMMENTS

FLUENCY & COHERENCE | 6.5

Strength: Uses natural hesitation. Priority: Short or underdeveloped answers.

LEXICAL RESOURCE | 6.5

Strength: Uses natural collocations. Priority: Repeats basic vocabulary.

GRAMMATICAL RANGE & ACCURACY | 7.0

Strength: Produces frequent error-free sentences.

PRONUNCIATION | 6.5

Strength: Uses meaningful intonation. Priority: Flat intonation.

PERSONALISED IMPROVEMENT PLAN

How to move towards Band 7.5

EXAMPLES FROM YOUR ASSESSMENT

Selected by your examiner

WHAT YOU SAID OR A REPEATED SPEAKING ISSUE

I like my neighbourhood. It is good and the people are good, so I enjoy living there.

A CLEARER OR MORE ACCURATE VERSION

I enjoy living in my neighbourhood because it is peaceful and the residents are welcoming, particularly when new families move into the area.

YOUR THREE PRIORITY ACTIONS

1

PRIORITY

Short or underdeveloped answers

ACTION

Use Answer-Reason-Example: answer directly, explain why and add a real example. A simpler answer could be: 'Yes, I enjoy cooking because it helps me relax. For example, I make pasta at weekends.' A more developed answer could be: 'I enjoy cooking because it gives me a break from work, particularly at weekends when I have time to try unfamiliar recipes.' Practise with three Part 1 questions.

2

PRIORITY

Repeats basic vocabulary

ACTION

Create a five-phrase bank for one topic rather than learning isolated words. For technology, you could use rely on technology, protect personal data, keep in touch, screen time and access information. Give a one-minute answer and use two or three phrases only where they fit naturally, then reuse them with a different question.

3

PRIORITY

Flat intonation

ACTION

Choose 20-30 seconds of clear conversational English. Listen once, then shadow it by copying the rise and fall and the stressed words. Turn the audio off and give your own 30-second answer using a similar lively pattern but completely different words. Compare the intonation, not the accent.

YOUR ROUTE TOWARDS BAND 7.5

YOUR NEXT 3-4 WEEKS

1

MEASURE PROGRESS WITH ANOTHER RECORDED SPEAKING ASSESSMENT

Do not repeat the assessment immediately. After a focused practice block-normally at least 3-4 weeks-complete another Recorded IELTS Speaking Assessment. A human examiner will assess all four criteria again, while the rotating question bank prioritises material you have not previously received. This checks whether your improvements transfer to unfamiliar questions and helps you choose your next priority.

2

TEST YOUR PERFORMANCE UNDER PRESSURE WITH A PREMIUM LIVE MOCK

Choose a Premium Live Speaking Mock when you need the closest rehearsal of the real interview, particularly nearer your test date. Unseen questions and real-time follow-ups test how naturally you respond without pausing or re-recording. Detailed feedback is provided afterwards in the written report; feedback and questions are not covered during the live call.

ABOUT THIS REPORT

This is an independent assessment and estimated band score. The English Examiner is not affiliated with or endorsed by IELTS or its test partners. Final scoring decisions are made by a human examiner using the publicly available IELTS Speaking band descriptors.

OVERVIEW OVERALL PERFORMANCE

Examiner overview

Amelia communicated confidently across all three parts and supported most answers well. Her next step is to extend key ideas without relying on general vocabulary, while keeping her pronunciation clear when answers become longer.

STRENGTH FLUENCY & COHERENCE

Uses natural hesitation

You sometimes paused briefly to organise your ideas, rather than because you could not find the language you needed. These natural thinking pauses did not interrupt the overall flow of your answers.

STRENGTH LEXICAL RESOURCE

Uses natural collocations

You used several natural word combinations, such as words that commonly appear together in English. This made your answers sound more natural and showed good control of vocabulary.

STRENGTH GRAMMATICAL RANGE & ACCURACY

Produces frequent error-free sentences

You produced many sentences without grammatical errors while also trying more ambitious structures. This showed solid control and a willingness to use a wider range of grammar.

STRENGTH PRONUNCIATION

Uses meaningful intonation

You used changes in the rise and fall of your voice to emphasise important words and show when an idea was complete. This made your meaning and attitude clearer to the listener.

PRIORITY FLUENCY & COHERENCE

Short or underdeveloped answers

Some answers were short and needed more reasons, details or examples. This limited your opportunity to show the full range of language you can use.

PRIORITY LEXICAL RESOURCE

Repeats basic vocabulary

You repeated general words instead of choosing words with a more exact meaning. For example, 'a good film', 'good food' and 'good advice' give less information than 'an enjoyable film', 'delicious food' and 'useful advice'. This limited your vocabulary range and made some descriptions less clear.

PRIORITY PRONUNCIATION

Flat intonation

Your voice sometimes stayed at a similar pitch instead of rising and falling to highlight important words. This made longer answers sound flat and harder for the listener to follow.
